STAFF IMMUNIZATION POLICY

A. INFLUENZA

To avoid staff absenteeism during the influenza season, and to prevent transmission of influenza from personnel to clients, all staff will be encouraged to have a yearly influenza shot, before the influenza season starts. Those staff who are at increased risk for complications from influenza and are strongly encouraged to receive influenza vaccine are as follows:

1. Those with chronic disorders of the cardiovascular or pulmonary stems requiring medical follow-up or hospitalization within the preceding year;
2. Those with chronic metabolic disease (including diabetes) renal dysfunction, anemia, immunosuppression, or asthma severe enough to have required follow-up or hospitalization during the preceding year;
3. Otherwise healthy individuals 50 years of age or over.

B. HEPATITIS B VACCINE

Employees who come in contact with body fluids, shall be offered the option to undergo the series of three (3) Hepatitis B vaccinations as outlined by CDC (Centers for Disease Control). Health care workers who do not wish to be vaccinated must complete and sign a waiver stating they have received the offer of vaccination against Hepatitis B and declined.

1. Before immunizing, serologic screening for Hepatitis B need not be done unless the employee requests it.
2. Employees who are or think they might be pregnant will not be vaccinated without written direction from the employee's personal physician.
3. Employees who decline vaccination will not be discriminated against.
4. Prophylaxis with Hepatitis B Immune Globulin (HBIG) and vaccine should be used when indicated, such as following needle stick or other percutaneous exposure to blood, when employee is not adequately immunized following current ACIP guidelines.
5. If an employee initially declines Hepatitis B vaccination but requests it at a later date, vaccination shall be available.

C. HEPATITIS A

Prophylaxis with immune globulin will be offered to employees exposed to persons infected with Hepatitis A, following current ACIP recommendations on post-exposure prophylaxis.

D. MEASLES, RUBELLA, MUMPS

All employees need to demonstrate or receive immunity to Measles and Rubella disease. Measles, mumps, and rubella vaccines are combined as the MMR vaccine. Pregnancy is a contraindication to vaccination.

Employees may:

1. Provide documented evidence of two doses of measles and rubella vaccines (or MMR). These must have been given on or after the first birthday and received since 1968, with the second dose given at least one month after the first.

OR

2. Provide previous or new serological evidence of immunity (IgG) to measles and/or rubella (blood drawn by GCHD nurse and sent to the State lab) at no expense to the employee. Physician-diagnosed cases to be considered as evidence of immunity must be lab-confirmed.

Employees believed to be at risk for mumps will receive 2 doses of the MMR vaccine.

E. VARICELLA (CHICKEN POX)

Employees without a reliable history of varicella disease or serologic evidence of immunity may be vaccinated according to current ACIP guidelines.

F. TETANUS/DIPHTHERIA, PNEUMOCOCCAL VACCINE

These vaccines will be made available to Health District staff upon request according to ACIP recommendations.

G. TUBERCULOSIS TESTING

Skin testing will be done on employment and yearly with follow-up as indicated.

Initially upon employment, the staff person will undergo 2-step testing (the test is repeated 1 to 3 weeks following a negative result).

An employee with a prior positive skin test and with documented appropriate follow-up will sign an annual symptom check sheet.

Employees working directly with clients infected with or at risk for TB disease and/or in client home visiting capacities will receive skin testing every 6 months, or as indicated to meet L&I, CDC, and/or ATS guidelines.

ACIP and other established guidelines are subject to interpretation by the Health Officer and/or his designee(s), on a case-by-case basis.
